aleksanderborodin

Summary

NLP/AI developer focused on LLM inference and fine-tuning, RAG, knowledge extraction, and model evaluation/safety/jailbreaking; interests in fintech/economics and applied optimization.

Education

2023 – 2027 **Bachelor's degree (in progress)**, *FPMI MIPT*

Major: Applied Mathematics and Computer Science; GPA: 7.8/10.

Relevant coursework: Mathematical Analysis; Probability Theory; Linear Algebra; Computational Complexity; Algorithms; ML, Programming; Physics; Economics; Analytical Mechanics.

Professional Experience

2024-2025 **Model and Algorithm Developer**, *Regional Bank (client)*

- Developed and simulated a cash collection optimization algorithm; analysis of historical data projected a 20M RUB annual profit increase.
- Engineered a web scraping and analysis system to extract key data from the central bank's website that was unavailable via API.
- Built an internal RAG system to support business operations with document-based Q&A.
- Stack: Python, NumPy, Pandas, RAG, Web Scraping.

Projects

Personal Projects

2025 **prefix_injection_jailbreak**, *GitHub:* `aleksanderborodin/prefix_injection_jailbreak`

- Researched prefix attacks on LLMs via a method analogous to Choice Blindness experiments adapted to LLM behavior.
- Identified templates enabling models (e.g., Gemini 2.5 Pro, DeepSeek R1) to answer all MaltiousInstruct prompts on first attempt vs. near-zero baseline without templates.
- Stack: Python, LLM APIs.

2025 **edu_parser**, *GitHub:* `aleksanderborodin/edu_parser`

- Parsed lecture notes into entities and inferred prerequisites via BM25/embeddings with LLM-based relation verification.
- Delivered a working system applied to the first two years of MIPT math notes; became the foundation for a flashcard-based lifelong learning app (further development by another team).
- Stack: Python, BM25, embeddings, LLM.

Skills

Programming	Python (advanced); C++ (intermediate); C (basic-code reading); Assembler (basic-code reading).
Data/ML	PyTorch (basic); NumPy (intermediate); Pandas (intermediate); PostgreSQL (intermediate); Matplotlib (basic); Excel.
NLP/LLM	BM25; embeddings; RAG; LLM APIs (OpenRouter, g4f); evaluation; prompt/context engineering.
Backend	FastAPI (basic); LangChain (intermediate); LangGraph (beginner).
Systems	Linux (intermediate; home server administration, workstation usage).
Languages	Russian (native); English (B2+; certified by MIPT placement test).

Achievements

- Winner, team Wiki-races, Sirius (2023).
- Winner, International Experimental Physics Olympiad (IEPHO) (2023).
- Prize-winner, All-Russian Physics Olympiad: Grade 10 (2022), Grade 11 (2023).
